Click "Cancel" to close this screen if you need to confirm data before exporting XML.

(Supplemental remarks)

Data compatibilities between Old versions and Ver. 2.21

(1) External List

Not compatible

Users must use the external list Ver.2.21.

The external list of Ver. 2.20 or older can not be used because some of functions, such as material selecting function, doesn't work properly.

(2) CSV file

Compatible (Not compatible under a specified condition)

The JAMA Standard Material Datasheet can import CSV files created by older version sheet (From Ver. 2.01 to Ver. 2.20)

However some errors may occur because of the modification of materials and substances in the new external list.

In case of errors, the data has to be corrected.
