II. External list

3. Substance list

On and after the upgrade in June 2015, BPR related substances have been added. Please note that special statements for treating these substances are written in the GADSL reference list.

Allocation of GADSL classifications for "Biocidal coatings / biocidal additives, selected":

- Allowed to use: "D",
- Prohibited in one or more purposes (Product Type): "D/P"

In JAMA/JAPIA standard material data sheet shows even these substance names as "Brown for D, Purple for D/P and Red for P" simply according to GADSL classification. These substances may be treated as exemption depending on conditions.

(Supplemental remarks)

Data compatibilities between Old versions and Ver. 2.40

(1) External List

Not compatible

Users must use the external list Ver.2.41.

The external list of Ver. 2.40 or older cannot be used because some of functions, such as material selecting function, doesn't work properly.

(2) CSV file

Compatible (Not compatible under a specified condition)

The JAMA Standard Material Datasheet can import CSV files created by older version sheet (From Ver. 2.01 to Ver. 2.40)

However some errors may occur because of the modification of materials and substances in the new external list.

In case of errors, the data has to be corrected.
